and the winner is ...

Entry title: MaxPro – Smart Screen
Submitted by: Graphic Republik

Smart Screen is an alternative screening solution for flexo platemaking, which can be used with any existing digital imaging device and any plates from any manufacturer. Developed to produce visually superior tonal ranges, particularly in highlight areas, it is available as a module in the MaxPro suite or as an option in Star Plate.

MaxPro – Smart Screen Submitted by: Graphic Republik

'An innovation with universal appeal that offers improvements in quality to a high proportion of the market, for a relatively modest level of investment. A genuine working tool that moves the game on – innovation in a practical sense.'

Steve Donegan, director (left), receiving the award from David Galton, EFIA chairman.
